### PROTECTION

When you use the machine, always wear appropriate personal protective equipment:

## GENERAL SAFETY INSTRUCTIONS

- never use the machine without the input or output
- do not climb into the input
- make sure that the panic bar is always unobstructed when the machine is used
- make sure that you can immediately operate the panic bar when the machine is used
- do not tilt the machine when the engine is running
- use the machine in a well-ventilated area, do not use the machine indoor
- make sure that the fumes from the exhaust are blown away from the user
- keep a stable position during operation with your feet firmly on the soil
- when you chip material, your position must be level with the machine
- prevent a buildup of chipped material in the discharge zone
- immediately stop the machine if the blades hit an unwanted object, if the machine makes an unusual sound or if the machine moves irregularly
- do not leave the working machine unattended
- do not wear loose clothing
- keep away from moving parts inside the input and output
- keep the contact key away from children and from not approved users

## DANGER AREA

Stay out of the area on which the chipped material falls down. The radius is 12 meter from the output deflector position.

**A:** danger area for the high output

**B:** danger area for the low output (if applicable)
